

Jack Kitowski is the Chief of On-Road Controls for the California Air Resources Board. He is responsible for regulatory and implementation of clean air strategies for on-road motor vehicles. Specifically, his responsibilities include measures related to zero emission vehicles, light and heavy-duty hybrid electric vehicles, incentive and credit programs, mobile source planning for the State Implementation Plan, and elements of motor vehicle regulations for the control of Global Climate Change.

Mr. Kitowski has over fifteen years of regulatory, research, and planning experience with the Air Resources Board. He was graduated with honors from UCLA with a degree in Chemical Engineering and is a registered professional engineer.
